GABRIEL DE MELO MEURER

Junior Software Engineer

Maringá, Paraná, Brazil • +55 44 99732-2850 • gabrieldemelomeurer16@gmail.com • linkedin.com/in/gabrielmeurer • github.com/Dmeeloo

PROFESSIONAL SUMMARY

I started as an IT Support Technician and, in just over a year, grew into Software Engineer II — through an internship, Software Engineer I, and an internal promotion at GTF. I build full stack applications (web and mobile) with React, React Native, Node.js, and Python. I use Claude Code daily as part of my actual development workflow: generating and reviewing code, orchestrating agents for multi-step tasks, and automating day-to-day scripts.

PROFESSIONAL EXPERIENCE

Software Engineer II — GTF

Progression: IT Support Apprentice → Software Development Apprentice → Software Engineer I → Software Engineer II

Maringá, PR, Brazil · Hybrid · Full-time • May 2025 – Present

Promoted from Software Engineer I to Software Engineer II, taking on greater autonomy to scope and deliver features independently. Co-built FrotaON with one teammate, a logistics application that replaced a manual process with an automated workflow. Built and maintained 8+ APIs and contributed to 10+ dashboards over datasets with millions of records, using React, Node.js, Python, and optimized Oracle SQL queries. Using Claude Code daily for code generation, agent orchestration, and workflow automation; building Machine Learning models and LLM integrations.

Stack: React, Node.js, Python, Oracle SQL.

Front-end Developer — devfellowship

Remote · Indirect contract · Part-time • Jun 2025 – Present

Front-end development for web systems, concurrent with my role at GTF.

Stack: React.

Software Development Lead (Consultant → Director) — Unidev TI

Self-employed · Hybrid • Mar 2025 – Jan 2026

Led a small software development team, managing project scope, priorities, and delivery for client software projects. Applied Git-based workflows and project management practices in a self-employed/freelance capacity.

Stack: Git, Project Management.

PROJECTS

FrotaON — Fleet Management App

GTF · Logistics & Fleet · Internal Project

A fleet management application built together with one teammate, replacing a manual process with an automated workflow for requests, approvals, and vehicle checks. Web built with React, mobile app with React Native. Also designed the app's visual identity: name, logo, and color palette.

Stack: React, React Native, Node.js, Oracle SQL.

EDUCATION

UniCesumar — Maringá, PR

Associate Degree in Systems Analysis and Development • 2025 – 2027

TECHNICAL SKILLS

Frontend: React, React Native, TypeScript, JavaScript

Backend: Node.js, Python, REST APIs

Database: SQL, Oracle SQL

AI & Machine Learning: Claude Code, agent orchestration, workflow automation, code generation and review, Machine Learning model development, LLM integration

Other: Git

LANGUAGES

Portuguese (Native)

English (Intermediate)
