PROFESSIONAL SUMMARY

Full Stack Developer and Data Analyst with first contact with programming in 2023, pursuing a degree in Systems Analysis and Development since 2024. Experienced in delivering web and mobile applications, RESTful API integrations, and BI dashboards across corporate and startup environments. Skilled in React, TypeScript, Node.js, Java, Python and SQL, with hands-on experience in Power BI, QlikView and Qlik Sense. Focused on building functional, well-structured solutions aligned with real business needs.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — devfellowship

Maringá, PR • Remote • Jul 2025 – Present

Community-driven organization with a software factory delivering products for clients and a tech school training developers. Working as a Full-Stack Developer shipping web applications end-to-end.

- Development of web applications using React and TypeScript
- Participation in all stages of the software development lifecycle, from requirements to delivery
- Building and consuming RESTful APIs integrated with React frontends
- Component-driven frontend development with focus on scalability and reusability

Stack: TypeScript, React, HTML, CSS, Git.

Programmer I — GTF

Maringá, PR • On-site • Aug 2025 – Present

Corporate technology company. Working as developer and data analyst responsible for delivering web/mobile solutions and BI dashboards for internal and client-facing use cases.

- Development and maintenance of web and mobile applications and corporate solutions
- Creation and integration of services and APIs
- Development, updating, and migration of dashboards using Power BI, QlikView, Qlik Sense, and Apex
- Development of optimized SQL queries for analysis and reporting
- Requirements gathering and translation of business needs into technical solutions

Stack: Java, Python, JavaScript, SQL, Power BI, QlikView, Qlik Sense, Oracle SQL, Git.

PROJECTS

Frota On — Fleet Management Application

GTF • Internal Project

Mobile fleet management application developed internally at GTF. The system enables centralized control of vehicles, maintenance schedules, fuel tracking, and drivers, with real-time dashboards showing operational KPIs and fleet cost indicators.

- End-to-end mobile development of the fleet management application

- Implementation of modules for vehicle control, preventive maintenance, and fuel tracking
- Integration with internal APIs for real-time data synchronization
- Dashboard with operational KPIs: cost per km, maintenance alerts, and usage history

EDUCATION
